Tailwind	● ● ● ● ●
NextJs	● ● ● ● ○
Socket	● ● ● ○ ○
Web Worker	● ● ● ● ○
Spring Boot	● ● ● ○ ○

Experience

● Software Engineer

Team Dhaka

Dec, 2019 - Current

In Team Dhaka my responsibilities include creating front-end components, integrate API in different UI components, show data in tables, create form components for different kinds of input, use graphs to visualize data, manage user authentication and role based access, create backend API for data access, dockerize applications and deploy them, review code from peers, fix bugs in the system, refactor any functionality with new technology and best practices, manage tasks, suggestions for improvements and more.

Top Projects

Tourbot

Admin panel for managing tours

Created functionality for managing bookings, vendors, agencies.
Tech stack: React, Tailwind, Redux, Web Workers, Spring Boot.

Foorum

Social media & Learning platform

Implemented user login, video player, photo/video carousel, rich text editor and more. Tech stack: TypeScript, React, DraftJs, Socket etc.

Bolt+ TV

Entertainment app for running in smart TV

Developed all the functionality including user login with QR code, playing live video stream, live chat, navigation using arrow buttons and more. Tech stack: NextJs, React, TypeScript, Tailwind, Socket etc.
